

Usage

```
{{Str_left|<string>|<count>}}
```

Gives the <count> characters from the start of the string.

If <count> is invalid or empty, an empty string is returned. If undefined, it defaults to 1.

Examples

- ```
{{Str left| lorem ipsum dolor sit amet | 10 }}
```
- ```
{{Str left| lorem ipsum dolor sit amet | 1 }}
```
- ```
{{Str left| lorem ipsum dolor sit amet | foo }}
```
- ```
{{Str left| lorem ipsum dolor sit amet | }}
```
- ```
{{Str left| lorem ipsum dolor sit amet }}
```
